Developer Profile

Passionate Full-Stack Developer with unique blend of 15+ years enterprise IT infrastructure experience and creative web development expertise. Self-taught programmer with proven ability to bridge technical complexity and user experience, demonstrated through personal portfolio projects and professional system integrations. Committed to delivering customer-focused solutions while fostering collaborative relationships built on respect, consistency, and innovative problem-solving. Create meaningful digital experiences that solve real problems while continuously learning and growing alongside forward-thinking organizations.

Technical Stack

Category	Details
Frontend Development	
Languages	HTML5, CSS3, JavaScript (ES6+), TypeScript
Frameworks	React, Vue.js, Angular (learning)
Styling	SASS/SCSS, Tailwind CSS, Bootstrap, CSS Grid/Flexbox
Tools	Webpack, npm/yarn, Git version control
Backend Development	
Languages	Node.js, Python, PHP
Frameworks	Express.js, Django (learning)
Databases	MySQL, PostgreSQL, MongoDB, Microsoft SQL Server (learning)
APIs	RESTful APIs, GraphQL, JSON handling, Third-party integrations
Cloud & DevOps	
Platforms	AWS (S3, EC2, Lambda), Microsoft Azure, Google Cloud
Automation	PowerShell, Bash scripting, CI/CD pipelines
Infrastructure	Docker containerization, server management, database administration
Security	Authentication systems, SSL implementation, security best practices
Development Tools & Methodologies	
Version Control	Git, GitLab, GitHub workflows
Project Management	Agile methodologies, JIRA, Confluence
Testing	Unit testing, integration testing, debugging
Design Tools	Figma, Adobe Creative Suite, responsive design principles

## Portfolio Highlights

### [hblondel.co.uk](https://hblondel.co.uk) | Personal Professional Portfolio

- Technologies: HTML5, CSS3, JavaScript, Responsive Design
- Clean, professional portfolio showcasing technical expertise and career progression
- Mobile-first responsive design with optimized performance
- Integration with professional CV and contact systems

### [societeilnoir.info](https://societeilnoir.info) | Creative Collective Platform

- Technologies: Modern Web Standards, Multimedia Integration, Community Features
- Sophisticated community platform for audio/visual artists
- Custom content management for project showcasing
- Emphasis on ethical and sustainable design principles
- Collaborative features supporting creative partnerships

#### Key Development Achievements:

- User Experience Focus: Intuitive navigation and engaging visual storytelling
- Performance Optimization: Fast loading times and smooth interactions
- Accessibility Compliance: Inclusive design following web accessibility standards
- Brand Integration: Cohesive visual identity reflecting core values of discipline, morality, consistency, and respect

## Professional Experience (Technical Foundation)

---

Senior Technical Professional | Various Organizations | 2008 - 2025

### Building Development Skills Through Infrastructure Expertise

#### Web Development Relevant Experience:

- System Integration: Extensive experience connecting different platforms, APIs, and databases
- User Interface Design: Configured and customized administrative interfaces for various enterprise applications
- Database Management: Hands-on experience with SQL Server, MySQL, and NoSQL databases
- Automation & Scripting: Created PowerShell and Bash scripts for system automation and data processing
- Cloud Platform Integration: Built web applications interfaces for AWS S3, Azure services, and third-party APIs
- Customer Service Excellence: 15+ years of client-facing experience understanding user needs and translating technical concepts

#### Key Technical Projects with Development Relevance:

- GitLab Implementation: Managed incident tracking and change request systems
- SSO Platform Configuration: Implemented OKTA authentication systems and web application integrations
- Web Application Management: Administered various enterprise web platforms and content management systems
- API Integration: Connected multiple systems through RESTful APIs and custom integrations

Recent Enterprise Roles | 2022 - 2025

- TradingHub Ltd: Senior Desktop Support Engineer managing web-based financial applications
- Mazars London: Service Delivery Consultant working with web-based enterprise tools

## Development Projects & Continuous Learning

### Self-Directed Learning Journey

**Autodidactic Approach:** Comprehensive self-study through online courses, documentation, and hands-on projects

- Frontend Mastery: Completed extensive training in React, Vue.js, and modern JavaScript frameworks
- Backend Development: Self-taught Node.js, Express, and database design through practical projects
- Full-Stack Integration: Built complete applications combining frontend interfaces with backend APIs

### Ongoing Projects

- E-commerce Platform: Building custom online store with payment integration and inventory management
- Community Management System: Developing web platform for creative collaboratives with user authentication and project showcasing
- API Development: Creating RESTful APIs for various client projects and personal applications

### Professional Development Commitment

- Growth Mindset: Continuously exploring new frameworks, tools, and best practices
- Community Engagement: Active participant in developer communities and open-source contributions
- Knowledge Sharing: Mentoring others transitioning into development through professional network

## Core Professional Strengths

### Customer-Centric Development

- User Experience Focus: 15+ years of understanding end-user needs and translating requirements into technical solutions
- Client Relationship Excellence: Proven ability to build trust and deliver consistent results
- Communication Skills: Exceptional ability to explain technical concepts to non-technical stakeholders

### Problem-Solving Excellence

- Analytical Thinking: Systematic approach to debugging and troubleshooting complex issues
- Creative Solutions: Ability to find innovative approaches to technical challenges
- Process Optimization: Experience streamlining workflows and improving system efficiency

### Professional Values

- Discipline: Consistent commitment to code quality, documentation, and best practices
- Morality: Ethical approach to data handling, user privacy, and sustainable development practices
- Consistency: Reliable delivery of high-quality solutions and maintainable code
- Respect: Collaborative approach fostering positive team dynamics and inclusive development practices

## Education & Certifications

### Self-Directed Web Development Education

- Frontend Development: HTML5, CSS3, JavaScript, React, Vue.js
- Backend Development: Node.js, Express.js, Database Design

- Full-Stack Integration: API development, Authentication, Deployment

#### **Technical Education:**

#### **Just IT Training Ltd** Network Professional Programme

- CompTIA A+ IT Technician
- CompTIA A+ Essentials
- Microsoft Certified Professional (MCP) - Windows Server 2003
- BTEC National Certificate - IT Practitioners

#### **Development Value**

- Unique Background: Enterprise IT experience provides deep understanding of system architecture and user needs
- Fast Learner: Proven autodidactic ability to master new technologies quickly and effectively
- Customer Service Excellence: 15+ years of client-facing experience ensuring project success and stakeholder satisfaction
- Creative Problem Solver: Combine technical precision with creative thinking for innovative solutions
- Growth Partnership: Committed to continuous learning and mutual development with forward-thinking organizations
- Full-Stack Capability: Comfortable working across the entire development stack from database to user interface

Available for:

Frontend Development, Backend Development, Full-Stack Projects, System Integrations, and Custom Web Applications
